---

An ambitious software developer seeking to expand my knowledge and skills with a team passionate about software development, computer engineering, learning and design.

### SKILLS

- HTML / SEO
- CSS / BEM
- JavaScript / ES6+
- JSON / AJAX / REST
- Sass / Bootstrap
- React / jQuery
- Node.JS / Express
- MongoDB / SQL
- Version Control
- Module Bundlers
- Package Managers
- Kanban PM Tools

### EXPERIENCE

#### Freelance Web Development | Ventura County | Aug 2020 - Present

- Writes clean, reusable and modular code using practices such as MVC, BEN, and asynchronous programming patterns.
- Consumes RESTful APIs and Designs UI/UX for interactivity.
- Manages content, SEO and hosting for clients.

#### Forkify Web-App | A Recipe Search Engine | Live Mar 2021

- A recipe search engine consuming and displaying data from an API.
- Used ES6 Modules with the module bundler Parcel and the toolchain Babel to transpile / polyfill for browser cross-compatibility.
- Implemented the Model-View-Controller architecture to ensure clean and easy to understand code that is easy to maintain and grow.

#### Campgrounds Web-App | Yelp Clone | Nov 2020

- A Yelp Clone, themed around camping locations. Users can sign up, leave comments, and save their favorite campgrounds.
- Used the Node libraries Express and Mongoose to fetch and update data with MongoDB.
- Implemented authorization into the application using the library Passport.

### EDUCATION

- Udemy | Web Development Bootcamp | Aug 2020 - Oct 2021
- Udemy | The Complete JavaScript Course | Nov 2020 - Mar 2021
- Udemy | Microsoft SQL from A to Z | Present
