- JSON / AJAX / REST
- Sass / Bootstrap
- React / jQuery
- Node.js / Express
- MongoDB / Mongoose
- SQL Server / SSMS
- Module Bundlers
- Package Managers
- Version Control

EXPERIENCE

Freelance Web Development | Ventura County | Aug 2020 - Present

- Writes clean, reusable and modular code using practices such as MVC, BEN, and asynchronous programming patterns.
- Consumes RESTful APIs and Designs UI/UX for interactivity.
- Manages content, SEO and hosting for clients.

Forkify Project | A Recipe Finder | Live Mar 2021

- Used ES6 Modules with the module bundler Parcel and the toolchain Babel to transpile / polyfill for browser cross-compatibility.
- Implemented the Model-View-Controller architecture to ensure clean and easy to understand code that is easy to maintain and grow.
- Created user stories and flowcharts to plan-out the applications functionality from the perspective of a user.

Campgrounds Project | Yelp Clone | Nov 2020

- Used the libraries Express and Mongoose in conjunction with each other to fetch and update data with MongoDB.
- Added authorization into the application using the library Passport.
- Followed CRUD best practices when implementing RESTful routing.

EDUCATION

- Udemy | Web Development Bootcamp | Aug 2020 - Oct 2021
- Udemy | The Complete JavaScript Course | Nov 2020 - Mar 2021
- Udemy | Microsoft SQL from A to Z | Present
